

# CMPIC Preferred Vendor

Auto-trol Technology and KONFIG provide customers a complete configuration management solution

**"The Configuration Management Process Improvement Center (CMPIC) has recognized Auto-trol Technology as a Preferred Vendor."**

**Steven Easterbrook**  
CMPIC President

## Why Auto-trol Technology was chosen as a CMPIC Preferred Vendor:

- 1) Auto-trol has personnel who understand configuration management (CM) requirements and guidelines of various industry approved standards.
- 2) Auto-trol has CMPIC trained individuals active in defining and developing KONFIG, a configuration management software solution.
- 3) Auto-trol's premier CM product, KONFIG, has the capability to enable efficient identification, change management and status accounting (recording and reporting information) in a manufacturing, IT, facilities and/or software development environment.
- 4) Auto-trol Technology is active in the CM professional community, attending CM conferences, online CM discussion groups and maintaining membership in various CM associations.

## What is CMPIC?

CMPIC is the Configuration Management Process Improvement Center. CMPIC was founded in 2008 and continues to lead the way in high quality, cost-effective and up-to-date configuration management training, certification and consulting. CMPIC staff is recognized worldwide as experts in CM process and implementation. CMPIC courses are sponsored by the University of Houston.
