

KONFIG[®] — A Total Information Management Solution

KONFIG[®]

A comprehensive information management system, KONFIG[®] provides organizations world-wide an integrated, **central repository for managing:**

- ◆ **Hardware and software,**
- ◆ **Projects and facilities,**
- ◆ **Policies and Procedures,**
- ◆ **People and Processes,**
- ◆ **Documents and Data.**

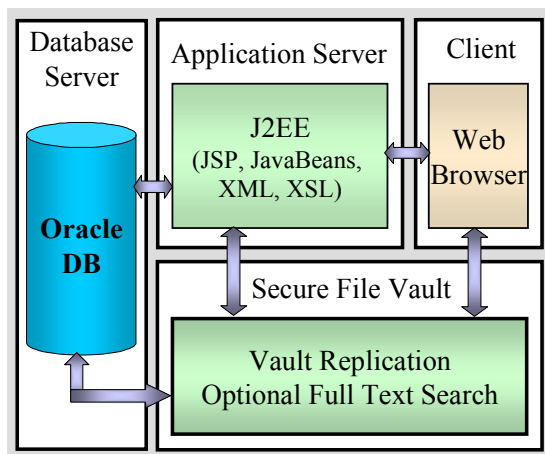

Leveraging technology originally developed and proven for the U.S. Space Program, KONFIG is preferred by organizations world-wide to gain and sustain a competitive business process infrastructure.

Web-based Architecture

KONFIG is built upon a **n-tiered, fully scalable, distributed, J2EE-based architecture.** By utilizing standard internet technologies like **JAVA** and **JSP**, KONFIG establishes itself as the premier technology solution for all your information management needs.

Robust Security

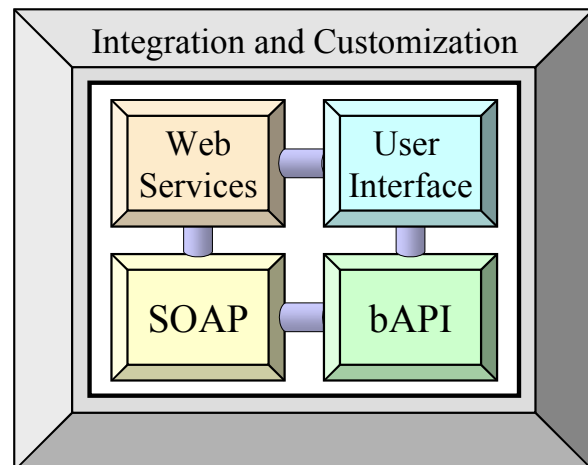

Building on its already **proven record** of exceptional security, KONFIG ushers in a new era of **safe guarding information** through the use of industry-accepted **secure technologies.** You can depend on KONFIG to provide **secure access** to a variety of users to the **right information, at the right time** across the global enterprise.

KONFIG WEB Architected

Unmatched Flexibility

Discover the possibilities of **Total Configuration Management** in your enterprise by taking KONFIG beyond its already outstanding off-the-shelf capabilities. As a full-service provider, Auto-trol supplies integration and consulting services, training, and software support to seamlessly integrate KONFIG into the customer's business processes, adapting a solution that accommodates customer's specific needs.

KONFIG - Total Information Management

KONFIG, certified four (4) star **CMII[®]-compliant** by the respected Institute of Configuration Management (ICM), is the only true **Total Configuration Management (TCM) solution** that provides the enabling technology framework to facilitate **enterprise-wide data and business process management.** KONFIG provides a powerful, dynamic, and integrated platform for:

- ◆ Configuration management (CM),
- ◆ Electronic Data and Document Management (EDM),
- ◆ Product Data Management (PDM),
- ◆ Product Life Cycle Management
- ◆ Software Configuration Management (SCM),
- ◆ Network & IT Service Management.
- ◆ Business Process Automation.

KONFIG[®] — A Total Information Management Solution

Business Process Automation

KONFIG's workflow is based on the Object Management Group (OMG) Business Process Modeling Notation (BPMN).

The intuitive web-based graphic Workflow Editor allows for flexible process modeling with a high degree of automation including powerful scripting and data driven decision gates.

Full Text Search

KONFIG's optional Full Text Search supports searching the content of Microsoft Office documents, PDF and plain text files stored in KONFIG vaults.

The KONFIG Environment
