

### **TRN-K-TT KONFIG Train the Trainer**

This course is designed for companies that need to train a large number of beginning and intermediate KONFIG users in the KONFIG Fundamentals, Administration, or Workflow Designer courses. After completing this course, trainers should be able to use Auto-trol's KONFIG training materials to teach others at their site, or to develop and use their own company or site-specific training materials.

Approximate course length: 2 days

Who should attend:

- New or experienced trainers who have a working knowledge of database, document management, configuration management, product data management, and workflow concepts.

This course teaches students how to:

- Work with the sample KONFIG training environment
- Develop teaching methods and materials effective for adult learners
- Use teaching tips and strategies specific to KONFIG
- Use and modify Auto-trol training materials

Additionally, students will teach several practice lessons to apply what they learn in class and to get feedback about their performance from the instructor and other students.

Prerequisites:

- KONFIG Fundamentals - if purchased Right-to-Use for that course
- KONFIG Administration - if purchased Right-to-Use for that course
- KONFIG Workflow Designer - if purchased Right-to-Use for that course
- Customer must purchase the Right-to-Use Auto-trol Training Materials, sold separately
- If training is to be conducted at the customer site, customer must complete a Conditions for On-Site Training form.
