

TRN-K-UPD KONFIG Update Training

The KONFIG Update curriculum informs existing users about the latest features provided in the current product release. In addition to these productivity-enhancing features, the facilitator provides instruction on how to administer and support the current KONFIG environment using the fully web-enabled administration functions.

Approximate course length: 1 day

Prerequisites:

- Must be an existing user possessing KONFIG proficiency
- If training is to be conducted at the customer site, customer must complete a Conditions for On-Site Training form
