

TRN-TI-QA Advanced Graphics Commands & Macro Programming

This advanced course teaches students how to customize tools to match their processes and to automate repetitive tasks. This course can help students achieve greater accuracy and efficiency with Tech Illustrator (TI).

This course builds on the concepts in the TI / Series 5000 Command Reference. Students will learn how to write Quick Actions (macros) and use selected Series 5000 and TI commands.

Approximate course length: 3 days

Who should attend:

- Technical Illustrators
- Technical Authors

This course teaches students how to:

- Understand the basics of Quick Actions
- Use the Calculator
- Redirect Quick Actions
- Control user input and manage errors

Prerequisites:

- Programming or script writing experience
- Technical Illustrator Fundamentals course or equivalent experience
- Familiarity with Series 5000 and TI commands – recommended
- Background in technical illustration and computer-aided publishing
- If training is to be conducted at a customer site, customer must complete a Conditions for On-Site Training form
